Finnish democracy

Miki Toivonen and Elli-Noora Nieminen

General knowledge

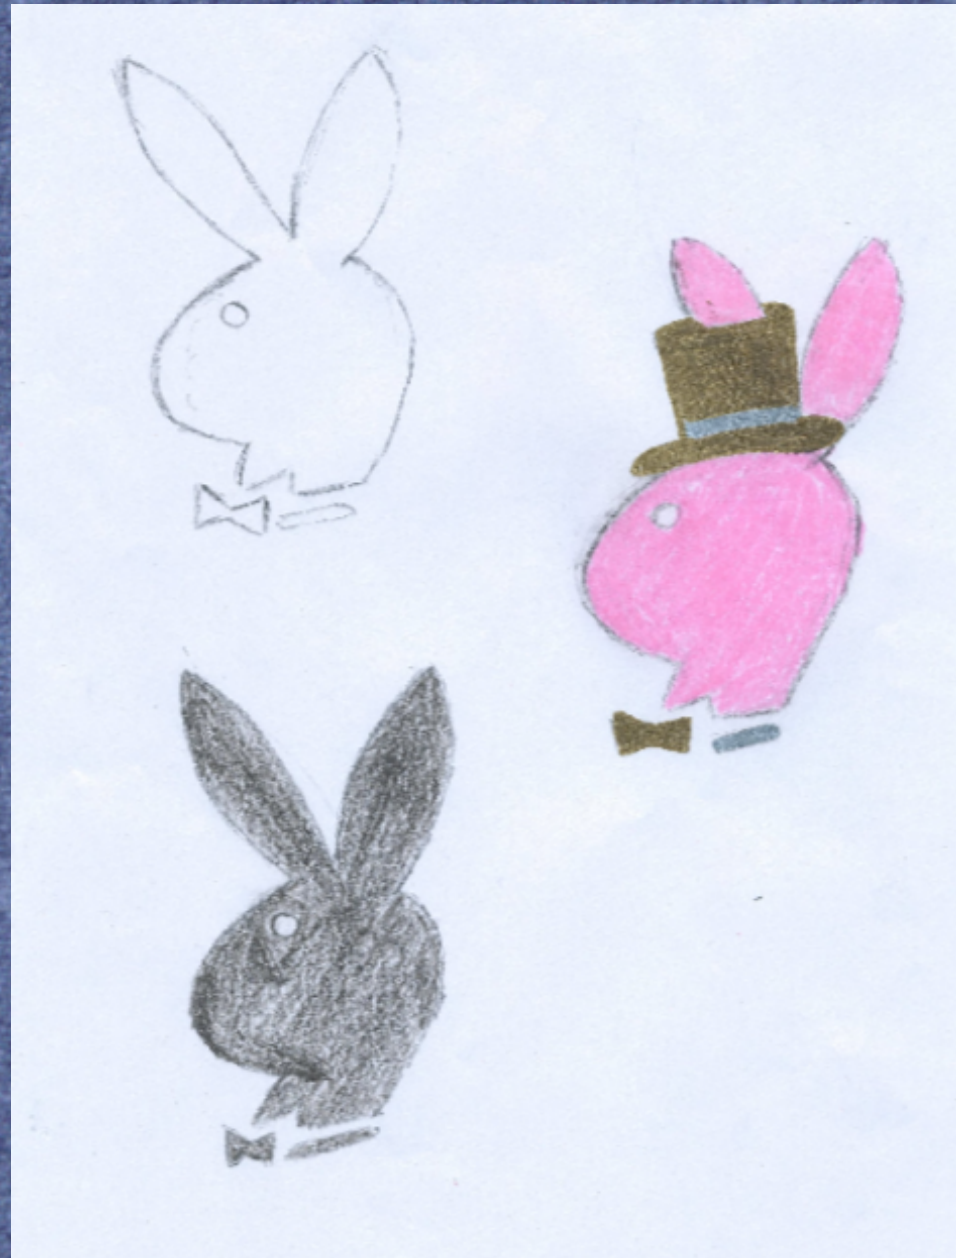

- President Tarja Halonen
- 200 Members of Parliament
- Election
- Democracy of the parliament
- multi-party system

How we won the project and who chose us?

First all the 9th grade students made groups and formed parties during social studies lessons. Then every class chose one winner. After that 7 "class" winners gathered to one big presentation of the parties in our canteen and after that an election took place. All the 7th and 8th grade students voted for the winner. And we won!

FCA!

What is the FCA-party?

- FCA means For Classes -party.
- Our goals are:
- to create own hang-around-corners for each grade.
- to improve the well being of every student in our school between boring working days.
- to improve our current hang-around-places

How does our idea work?

- We'll create own hang-around-corners for each grade.
- Seventh-graders would get their own space in our corridor. We will get rid off of the coat racks.
- Eight-graders would get the smaller lounge.
- Ninth-graders would get the bigger lounge.
- (Picutres of these places later)

What are the corners going to be like?

- Our first and the most important intention is to make the corners comfortable.
- In every corner there will be at least some sofas and two tables where you can do your homework or play cards.
- In our opinion it would be nice if every grade can design their own hang-around-corner and make it look personal.

How will we furnish and pay the project?

- We'll try to get many old sofas and tables from different firms and also from private persons
- For the money which we'll get from the school for this project we are going to buy some sofas and give a small sum of money for the grades to decorate their own hang-around-corners.

Pictures of our school

Canteen

Our canteen is the biggest place in our school and the whole junior high school fits there.

This is the cosiest place in our school.

Corridor

Here we have planned to put the 7th grade students hang-around-place.

Now this is only a place where students leave their coats or things.

Lounge

This will be the place for the 9th grade students.

This is currently a place where students hang around during breaks.

Snack machine

This machine is new in our school. It's only one month old.

This doesn't belong to our project but is a innovation in our school.

Smaller lounge

This place will be for the 8th grade students.
